Internship Program

SYNTECXHUB

CREATE | THINK | SOLVE

Company Background

Syntecxhub is a forward-thinking company that bridges learning with practical experience. We provide internship projects across exciting fields like **Web Development, UI/UX Design, Frontend & Backend Development, Data Science,** and more, helping students gain real-world skills.

Our internships offer mentorship, hands-on tasks, and exposure to live projects, enabling students to enhance their knowledge, build confidence, and prepare for successful careers.

Instructions

- Share your internship status on **LinkedIn** and mention **@Syntecxhub**.
- Upload your **entire source code** to **GitHub**, creating a repository named: **Syntecxhub_Project_Name.**
- You will receive **weekly tasks** that must be completed and submitted via the **Submission Form** within the given time.
- **you are required to complete at least one project.** Completing **multiple projects** is optional but **highly encouraged**, as it **demonstrates initiative and a deeper interest in learning.**

Project - 1

Time series & category charts

- Plot sales over time (line charts) and monthly/quarterly aggregation.
- Use bar charts to compare categories and pie charts for share.
- Save charts to PNG and export a short summary.
- Discuss chart choice and label/legend/axis formatting.

🔗 **Example : Link 1, Link 2**

Project - 2

Statistical plots & distribution analysis

- Draw histograms, KDEs and boxplots to inspect distributions.
- Compare distributions across groups (e.g., region A vs B).
- Detect outliers and comment on skewness / spread.
- Export plots and a one-paragraph interpretation.

Project - 3

Correlation heatmap & pairwise relationships

- Compute Pearson correlations between numeric features.
- Visualize as heatmap (mask upper triangle, annotate values).
- Use pairplots / scatter matrix for key variable pairs.
- Summarize strongest positive/negative relationships.

Submission Details

- Each task consists of **three projects**. Every intern is **required to complete and submit at least one project** from each task.

- Completing all assigned weekly tasks is **mandatory** to successfully finish the internship. If an intern fails to complete the required projects, the internship will be considered **incomplete**, and the **certificate will not be issued**.

- Please ensure that all completed projects are submitted through the official **Submission Form** to confirm your **successful participation in the internship program**.
